CASE STUDY

Mini Me'Zzz Childcare Nursery, Rossington, Doncaster · May 2021

Instant lockdown and emergency alerts for an early years setting

Seconds
To alert every member of staff

Sound + light
Audible and visual alerts

All areas
Every occupied room covered

Mini Me'Zzz Childcare Nursery needed a reliable way to communicate emergencies quickly and effectively across the setting. Caring for young children, staff needed a system that could instantly alert everyone during lockdowns, security incidents, medical emergencies or safeguarding concerns. They had relied on word of mouth and mobile phone calls, which could cause delays when every second counts.

THE CHALLENGE

- Instantly alert all staff during lockdowns, security incidents, medical emergencies or safeguarding concerns
- Replace word of mouth and mobile phone calls, which risked delays
- Make sure alerts are received clearly in every occupied area
- Keep it simple enough to use under pressure

THE SOLUTION

- Instant lockdown activation at the touch of a button
- Audible and visual alerts throughout the nursery
- Multiple alert levels for different emergency scenarios
- Simple operation requiring minimal staff training
- Reliable communication across the entire site
- Support for emergency planning and safeguarding procedures

> "Since Maisy and Lawrence installed the system, it's given us a stronger sense of protection, which makes us all feel confident that if something happened we'd be able to respond quickly to protect the children we look after. It also helps us meet our obligations as a registered childcare provider."

Kerry Worrall · Owner, Mini Me'Zzz Childcare Nursery

INSTALLATION

EdAlert supplied and installed a dedicated wireless lockdown alert system, tailored to the nursery's layout so alerts can be heard and seen clearly in all occupied areas.

Staff training and ongoing technical support were included as standard.

THE OUTCOME

The system now forms part of the nursery's wider safeguarding and emergency response procedures, helping make sure critical information reaches all staff immediately, when every second counts.

KEY BENEFITS

- Faster emergency communication across the site
- Increased confidence among staff during emergencies
- Improved preparedness for lockdown and safeguarding incidents
- A straightforward system that can be activated within seconds
- Enhanced protection for children, staff and visitors
