EdAlert
Every Second - Every School - Every Child

Lockdown alert systems
for UK nurseries, schools, colleges, SEND providers and children's homes

ONE ALERT: LOCKDOWN

One press. Every siren. Every staff member alerted in seconds.

Pressing and holding a staff fob for 3 seconds sounds the lockdown sirens and strobes, sends a push alert to every staff phone and brings in a 24/7 monitored response that verifies the alert and calls the police.

- **3-second hold** — No number to dial, no accidental alerts
- **Unmistakable** — Sirens and strobes, nothing like a fire alarm
- **Every staff phone** — Push alerts on and off site
- **24/7 monitored** — Verified, then police called for you

HOW IT WORKS

From one press to a verified police response

1 A staff member raises the alert
Press and hold the fob on their lanyard for 3 seconds, or the trigger in the staff phone app as a backup.

2 Sirens and strobes activate
Indoor and outdoor sirens sound and every strobe flashes. The tone is nothing like the fire alarm, so nobody evacuates by mistake.

3 Every staff phone is alerted
Push alerts reach every member of staff, including anyone off site or on their way back in.

4 The ARC is notified
At the same moment the IQ4 Hub alerts a 24/7 Alarm Receiving Centre over Wi-Fi, with 4G LTE backup.

5 The ARC verifies, then calls police
The ARC phones your pre-set contacts to confirm the alert is real, then calls the local police.

6 Your lockdown plan takes over
Staff secure rooms and care for pupils, in line with your own plan and DfE guidance.

Press and hold the panic fob for 3 seconds to raise a full lockdown
The hold stops accidental alerts. No menus and no choices under pressure. Sirens and strobes everywhere, every staff phone alerted, and the 24/7 ARC verifies the alert and calls the police.

The all-clear is only ever given in person by an authorised member of staff, never by a siren or app message.

MARTYN'S LAW

Ready for the new duty

Terrorism (Protection of Premises) Act 2025, expected in force April 2027 and regulated by the SIA.

Who it covers
Nurseries, schools and colleges expecting 200+ people on site at once (standard tier).

What you'll need
Procedures for evacuation, invacuation, lockdown and alerting everyone on site.

How EdAlert helps
A 3-second press raises the lockdown and alerts every person on site, with every alert logged.

THE SYSTEM

Every part built for one purpose

The IQ4 Hub control panel

QOLSYS IQ4 HUB · THE HEART OF THE SYSTEM

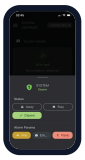

- Dual-band Wi-Fi with 4G LTE cellular backup to the ARC
- Rechargeable backup battery lasts up to 6 hours in a power cut
- Logs every alert with the date, time and who triggered it

Panic fob

WORN ON A STAFF LANYARD

- Press and hold for 3 seconds to raise a lockdown
- Always to hand, wherever staff are on site

Staff phone app

ON AND OFF SITE

- Push alerts wherever staff are
- Backup trigger if a fob isn't to hand

Classroom door contacts

WIRELESS · EVERY CLASSROOM DOOR

- Fitted to every classroom door
- Monitor which doors are closed and which are open

Signal repeater

LARGE AND SPLIT SITES

- Extends coverage to outbuildings
- Mains powered, battery backup

Indoor and outdoor sirens

TONE AND STROBE

- Sounds nothing like a fire alarm
- Flashing strobe on every siren

24/7 MONITORED RESPONSE

Someone is always watching over your alert

With the Monitored package, your EdAlert system is linked to a monitored Alarm Receiving Centre, staffed day and night, every day of the year.

1. **A real person verifies every alert**
   A trained operator calls your pre-set contacts the moment an alert comes in.
2. **Tests and accidental alerts filtered out**
   Verification happens before police are involved, so there are no wasted call-outs.
3. **The ARC calls the police for you**
   Staff focus on locking down instead of making phone calls.

BUILT ON POWERG+ TECHNOLOGY

Professional-grade wireless

Long range
Over 2 km line-of-sight, for large and split-site campuses.

Reliable signal
Frequency hopping beats interference and jamming.

Strong security
128-bit AES encryption; every device needs a PIN to join.

Live device health
Exact fob battery levels. Sirens warn about 5 weeks ahead.

Future-proof
Remote updates, with no site visit needed.

Locked to your installer
Hardware-level protection against takeover.

PowerG+ wireless technology is developed by Johnson Controls (JCI). The IQ4 Hub is made by Qolsys; Qolsys is a Johnson Controls brand. Named to describe the technology only; no endorsement of EdAlert is implied.

For: Nurseries · Primary schools · Secondary schools · Colleges · Multi-academy trusts · SEND providers · Children's homes

CASE STUDIES

More Than Ed, Doncaster

34 panic fobs · installed in 1 day · indoor and outdoor coverage · June 2025

> "The EdAlert system has surpassed our expectations. It's simple to use and reliable. The pupils can clearly tell the difference between the lockdown sirens and the fire alarm."

Jonathan Mundin · Lead for Health & Safety

Mini Me'Zzz Childcare Nursery, Rossington

Audible and visual alerts in every occupied room · May 2021

> "Since Maisy and Lawrence installed the system, it's given us a stronger sense of protection, which makes us all feel confident that if something happened we'd be able to respond quickly to protect the children we look after. It also helps us meet our obligations as a registered childcare provider."

PACKAGES & PRICING

Choose the right EdAlert package for your school

Three levels of protection and communication, with the flexibility to upgrade as your needs change.

Features & pricing	Essential	Connected	Monitored
Installation from	**£1,495 + VAT**	**£1,695 + VAT**	**£1,695 + VAT**
Monthly subscription	**None**	**£25 + VAT**	**£45 + VAT**
Extra devices, each (all packages)	Staff fob **£30** · Siren/beacon **£140** · Door contact **£70** (+ VAT)		
Central control panel and staff activation fobs	✓	✓	✓
On-site sirens and flashing beacons	✓	✓	✓
Professional installation and commissioning	✓	✓	✓
Initial staff training	✓	✓	✓
Remote server connection	–	✓	✓
Staff phone app notifications, on and off site	–	✓	✓
24/7 Alarm Receiving Centre monitoring	–	–	✓
ARC verification calls to agreed contacts	–	–	✓
Emergency-service escalation under the agreed response procedure	–	–	✓

ESSENTIAL

Straightforward on-site alerts

A standalone wireless system that allows staff to activate the school's sirens and flashing beacons using a portable fob. No internet or remote server connection is required. The school manages its response and contacts emergency services when needed.

£1,495 + VAT installation from
Monthly subscription: **None**

CONNECTED

Keep staff informed wherever they are

Everything in Essential, plus a remote server connection and staff phone app notifications. Keep staff informed on and off site, including those arriving at school. The school manages its response and contacts emergency services when needed.

£1,695 + VAT installation from
Monthly subscription: **£25 + VAT**

MONITORED

Add a monitored, verified response

Everything in Connected, plus 24/7 Alarm Receiving Centre monitoring. When an alert is received, an ARC operator calls your agreed contacts to verify the situation and follows your agreed escalation procedure, including contacting emergency services where appropriate.

£1,695 + VAT installation from
Monthly subscription: **£45 + VAT**

Start with Essential. Upgrade when you're ready.

All three packages use the same core system. Start with on-site alerts, then upgrade to Connected or Monitored as your requirements or budget change—without replacing the core equipment.

Upgrades are subject to suitable connectivity, setup charges and the applicable subscription.

What do starting prices include?

Starting prices cover a small, single-site school with up to 10 staff fobs, one indoor siren/beacon and one outdoor siren/beacon, including the central control panel, installation, commissioning and initial staff training.

Your final quotation follows a site survey. Additional devices, repeaters and larger staff teams are priced separately. Maintenance, replacement batteries and engineer visits are available separately.

Starting prices are based on a 10-fob system, but we can arrange quotes for bespoke smaller sites such as children's homes. Small sites: Essential with up to 5 fobs from £1,295 + VAT.

App notifications depend on connectivity and the receiving phone's notification settings. ARC escalation follows the agreed response procedure; police attendance cannot be guaranteed.

MAINTENANCE PLANS

Monthly maintenance, sized to your system

Choose the plan that matches the number of fobs, sirens and door contacts on your site.

SMALL SCHOOL

£25 + VAT
per month

10 FOBS	2 SIRENS	2 DOOR CONTACTS

Up to this many devices

STANDARD SCHOOL

£40 + VAT
per month

25 FOBS	4 SIRENS	4 DOOR CONTACTS

Up to this many devices

LARGE SCHOOL

£60 + VAT
per month

50 FOBS	8 SIRENS	7 DOOR CONTACTS

Up to this many devices

CAMPUS

£90 + VAT
per month

100 FOBS	12 SIRENS	13 DOOR CONTACTS

Up to this many devices

Every plan includes

- ✓ **An annual site visit, service and inspection**
- ✓ Faults diagnosed remotely before any visit is arranged
- ✓ Business-hours telephone and video support
- ✓ Preferential local call-out rate of £120 + VAT

ENGINEER VISITS

Engineer visits only when you need them

All EdAlert maintenance plans include business-hours telephone and video support, helping us diagnose issues before arranging a site visit.

Where attendance is required, maintenance customers receive a preferential local call-out rate of £120 + VAT, including travel within 25 road miles of our Follifoot base and the first hour on site.

Additional labour is charged at £60 + VAT per hour, billed in 30-minute increments. Parts and batteries not covered by your maintenance agreement are charged separately. Any additional travel charges are agreed before booking.

Other site visits are charged separately from your monthly maintenance subscription. Attendance is by arrangement during business hours; out-of-hours visits are subject to availability and a separate quotation.

> Charges for work covered by an installation or equipment warranty follow the applicable warranty terms.

LOCAL CALL-OUT

£120 + VAT

Travel within 25 road miles of Follifoot and the first hour on site
