CASE STUDY

Trusted by schools and nurseries

> "The EdAlert system has surpassed our expectations. It's simple to use and reliable. The pupils can clearly tell the difference between the lockdown sirens and the fire alarm."
>
> **Jonathan Mundin** · Lead for Health & Safety, More Than Ed, Doncaster

> "It's given us a stronger sense of protection, which makes us all feel confident that if something happened we'd be able to respond quickly to protect the children we look after."
>
> **Kerry Worrall** · Owner, Mini Me'Zzz Childcare Nursery, Rossington

- **Installation and training:** by qualified Qolsys engineers. Maintenance plans from £25 + VAT a month, including an annual service
- **Easy staff changes:** add or remove fobs and app users as staff come and go
- **Minimal disruption:** wireless, often installed in a day

MARTYN'S LAW

Ready for the new duty

The Terrorism (Protection of Premises) Act 2025 is expected to come into force in April 2027. Settings expecting 200+ people need procedures for evacuation, invacuation, lockdown and alerting everyone on site. EdAlert raises the lockdown and alerts every person in seconds, with every alert logged.

EdAlert

Every Second - Every School - Every Child

LOCKDOWN ALERT SYSTEM

One press. Every siren. Every staff member alerted in seconds.

For UK nurseries, schools, colleges, SEND providers and children's homes.

Book a free demo **0800 690 6462**

HOW IT WORKS

From one press to a verified police response

1. **A staff member raises the alert**
   Press and hold the fob on their lanyard for 3 seconds, or the trigger in the staff phone app.

2. **Sirens and strobes activate**
   Indoor and outdoor, across the whole site. The tone sounds nothing like the fire alarm.

3. **Every staff phone is alerted**
   Push alerts reach every member of staff, on site or off.

4. **The ARC is notified**
   The IQ4 Hub alerts a 24/7 Alarm Receiving Centre over dual-band Wi-Fi, with 4G LTE backup.

5. **The ARC verifies, then calls police**
   Pre-set contacts confirm the alert is real before the police are called.

6. **Your lockdown plan takes over**
   Staff secure rooms and care for pupils in line with your plan and DfE guidance.

The all-clear is only ever given in person by an authorised member of staff, never by a siren or app message.

THE SYSTEM

Every part built for one purpose

IQ4 Hub control panel
Dual-band Wi-Fi with 4G LTE cellular backup. Rechargeable backup battery. Logs every alert.

Panic fob
Worn on a staff lanyard. Press and hold for 3 seconds to raise a lockdown.

Indoor and outdoor sirens
Lockdown tone and strobe light, heard inside and across the grounds.

Classroom door contacts
On every classroom door. Monitor which doors are closed and which are open.

Staff phone app
Push alerts on or off site, and a backup trigger if a fob isn't to hand.

Signal repeater
Extends coverage to outbuildings, split sites and playing fields.

Built on PowerG+ long-range, encrypted wireless technology from Johnson Controls.

3-SECOND HOLD

A full lockdown in seconds

The panic fob
Worn on a staff lanyard, always to hand. Supervised PowerG wireless.

Lockdown: press and hold the panic fob for 3 seconds
No menus and no choices under pressure. Sirens and strobes everywhere, every staff phone alerted, and the 24/7 ARC calls the police.

No accidental alerts
The button must be held for 3 seconds, so a knock won't set it off. The Alarm Receiving Centre also checks with your setting before any police call is made, so any alert raised by mistake is simply logged.

Someone is always watching over your alert
A monitored Alarm Receiving Centre, staffed day and night, verifies every alert and calls the police for you, so staff can stay with pupils.

Nurseries · Primary schools · Secondary schools · Colleges · SEND providers · Multi-academy trusts · Children's homes
